(54) IMAGE TRANSMISSION SYSTEM

(57)Abstract:

PROBLEM TO BE SOLVED: To attain image transmission with a simple configuration even when an image input output means does not directly connect to a line.

SOLUTION: The image transmission system is provided with a controller 1 having a display device and connecting to a line such as a public network (ISDN) or the like and with a digital color copying machine 2 that is an image input output means connecting to the controller 1 as a separate unit. The controller 1 controls image input output by the digital color copying machine 2 and image transmission via the line.
